MAFDEL

THE EUROPEAN MANUFACTURER OF THERMOWELDABLE CONVEYOR BELTS

Mafdel is a family-owned company, which, since 1981, has been designing and manufacturing a wide range of thermoweldable conveyor belts, profiles and associated tools.

Mafdel's product range is manufactured in France at the group's 3 factories:

Saint-Georges d'Espéranche (38)

Heyrieux (38)

Vigneux de Bretagne (44)

Whether it's extruding, calendaring or fitting accessories, our production is managed by our experienced technicians, ensuring an optimised level of quality.

When you work with Mafdel, you can be assured that the solution will satisfy the most arduous challenges whether they be hygienic, mechanical or environmental.

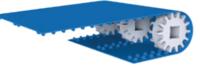

AN EXTENSIVE RANGE

Thermoweldable profiles

Monolithic conveyor belts

Positive drive belts

Welding and tooling

Accessories, such as guides, slides, scrapers and sprockets are all available.

MAFDEL

A TEAM OF EXPERTS AT YOUR SERVICE

Our design and technical sales teams are at your service to help you to create belts to meet your product handling requirements.

Our large stocks and the flexibility of our production facilities ensures the shortest delivery times possible.

A WORLDWIDE PRESENCE

Mafdel products are available worldwide through a network of distributors and partners in over 60 countries.

Find your sales and technical contacts in France, abroad and at trade shows:

Mafdel is an active member of:

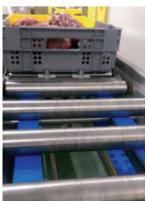

APPLICATIONS

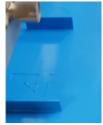

APPLICATIONS

ADVANTAGES

Our positive drive homogeneous conveyor belts combine all the advantages of modular belts and solid conveyor belts without the hygiene issues.

Made of polyurethane or polyester elastomer, these belts are suitable for most handling applications in a variety of industries, particularly in the food-processing industry.

OPTIMIZED OPERATION

- No risk of slippage, even in greasy and humid environments
- Belts operate without tension, reducing the stress on the conveyor's mechanical components: shafts, anti-friction bearings, roller bearing, etc.
- No need for tensioners
- Lightweight
- Silent operation
- High abrasion and tear resistance
- For belts fitted in pairs, the positive drive ensures synchronized operation
- Fully moulded teeth

OPTIMAL HYGIENE LEVEL

- Fully EC-FDA compliant
- Solid impervious and rot-proof belt
- Labour and water saving
- Resistant to all common food industry chemicals including solvents, oils, greases...
- Suitable for scraper applications

ADVANTAGES

REDUCED PRODUCT CONTAMINATION

- Reduced risk of bacterial growth
- No fabric contamination removing the risk of fraying
- No detachable parts
- Reduced contamination risk

LOWER OPERATING COSTS

- Long service life
- Quick and easy to clean without dismantling
- Significant reduction in water and detergent consumption
- Low maintenance costs

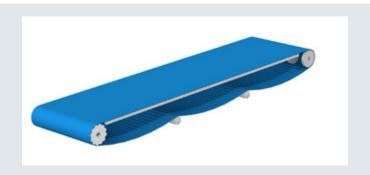

| | POSITIVELY DRIVEN CONVEYOR BELT | HOMOGENEOUS CONVEYOR BELT | MODULAR BELT |

CONFIGURATION

HORIZONTAL CONVEYOR

BIDIRECTIONAL CONVEYOR

FLIGHTED AND SIDEWALL CONVEYOR

SWAN-NECK CONVEYOR

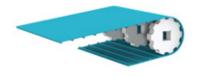

TROUGHED CONVEYOR

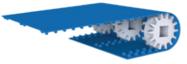

CHARACTERISTICS

| DEL/DRIVE® | POSITIVEBELT® | S/DRIVE® | DEL/SYNC® | |
|---|---------------------------------|------------------------------|-------------------------------|--|
| Positive drive | Self-tracking positive drive | Positive drive | Fully synchronous drive | |
| Direct retrofit on modular applications | Perfect tracking | Perfect centring | Accurate positioning | |
| Teeth over the entire width | Double rows of teeth | One or two rows of teeth | Centrally positioned teeth | |
| Operation without tension | Operation without tension | Operation without tension | Tensionned operation | |

Our positive drive belts comply with the most stringent international standards and help to provide an optimum level of hygiene to meet HACCP* requirements in the following areas:

Poultry

Cheese dairies

Bakeries- Industrial pastry-making

Meat

Fruit

Ready meals

Fish

Vegetables

Frozen foods

The DEL/DRIVE® positive drive belt meets the **most stringent standards of hygiene** and is **the ideal alternative to conventional modular belts**. It replaces a modular belt without any modifications. It is either driven on a sprocket or a motorized drum.

The DEL/DRIVE® belt is installed **without tension**, thereby reducing stress on the conveyor's mechanical components: shafts, anti-friction bearings, roller bearing, etc.

DEL/DRIVE® can be configured with flights, sidewalls or other profiles.

The DEL/DRIVE® comes in several versions to meet all needs:

The DEL/DRIVE® 50 belt in polyurethane is both flexible and has high tensile strength. It is the ideal solution for the conveyance of light to medium-weight loads. The DEL/DRIVE® 50 is available in blue or white.

The DEL/DRIVE® 50EM belt is a variant of the DEL/DRIVE® 50 belt with a structured top side for improved transport of frozen products.

The DEL/DRIVE® 50H belt in polyester elastomer is recommended for medium to heavy loads and can be used with long centre-to-centre distances. In certain cases, its high tensile strength and low friction coefficient permits accumulation of transported products. It can withstand higher peak temperatures, depending on the load.

The DEL/DRIVE® 50EMLT belt is specially designed to operate in very low ambient temperatures. Its embossed top surface facilitates the conveyance of frozen products.

The DEL/DRIVE® 50AM belt has the same characteristics as the DEL/DRIVE® 50 belt plus an infused antimicrobial treatment. DEL/DRIVE® 50AM improves food safety by inhibiting the proliferation of bacteria.

This prevents the contamination of transported products.

A further benefit is the reduction of odours and cleaning cycles.

The DEL/DRIVE® 50AMEM belt has an infused antimicrobial treatment and an embossed top surface that reduces adherence of the products on the belt.

The DEL/DRIVE® 50-25 belt has 50mm drive teeth on one face, and 25mm drive teeth on the other allowing one side to drive and the other to act as low flights for increased grip.

SPROCKETS AND IDLER WHEELS

| REFERENCE | PRODUCT | MATERIAL | COLOUR | OUTER DIAMETER (mm) | NUMBER OF TEETH | SQUARE BORE (mm) | WIDTH (mm) |
|-----------|----------|----------|--------|---------------------------|--------------------|---------------------|---------------|
| P50BUN06 | Sprocket | HDPE | Blue | 95 | 6 | 40 | 32 |

| R50BUN08 | Wheel | HDPE | Blue | 116 | - | 40 | 32 |
| P50BUN10 | Sprocket | HDPE | Blue | 161 | 10 | 40 | 32 |
| R50BUN10 | Wheel | HDPE | Blue | 149 | - | 40 | 32 |
| P50BUN12 | Sprocket | HDPE | Blue | 193 | 12 | 40 | 32 |
| R50BUN12 | Wheel | HDPE | Blue | 181 | - | 40 | 32 |

The standard sprockets we offer have a square bore for a 40x40 mm drive shaft.

They can be mounted on other shafts with special adapters.
Please enquire for any other dimensions of round or square shaft.

SPROCKETS FOR DRIVING DRUM

POSITIVEBE

The positive drive thermo-weldable POSITIVEBELT® PO2 offers exceptional guidance thanks to the dual row of teeth.

The perfectly smooth top side makes it easy to clean and maintains an optimal level of hygiene.

The belt is guided within the gaps of the conveyor support rails. The belt tolerates side loads without the risk of tracking off.

The belt is driven by sprockets mounted on a square shaft or a drum motor.

The POSITIVEBELT® PO2 belt is mounted without tension, thus reducing the stress on the mechanical parts of the conveyor: shafts, bearings, etc.

An open, cantilevered conveyor design is possible dur to the absence of belt tension, making it easier to remove and re-fit the belt when it is regularly used.

The belt can be equipped with cleats or sidewalls.

The POSITIVEBELT® PO2 belt can be trough-shaped.

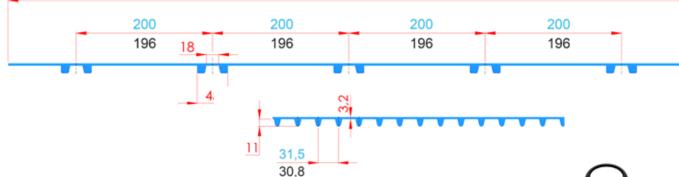

POSITIVEBELT® PO331LB2AM is available with an antimicrobial treatment in the mass. This treatment inhibits the growth of bacteria and prevents contamination of the products being transported. It also improves food safety, reduces the development of odours and facilitates the cleaning of conveyor belts.

POSITIVEBELT® PO331LB2 is an aramid cord reinforced version which limits the elongation.

The POSITIVEBELT® PO331LB2H polyester elastomer belt is recommended for medium to heavy duty conveying and can be used on large centre distances. Its high tensile strength and low coefficient of friction allow, in certain cases, the use with accumulation of the transported products. It can accept higher peak temperatures, depending on the loads carried.

POSITIVEBELT® PO1 Reinforced

POSITIVEBELT® PO1 is a reinforced version with aramid cords (except PO131LB).

It is particularly suitable for applications requiring **good adhesion** or **small pulley diameters**.

The distributed reinforcement allows a high load capacity, even on small widths.

It is possible to add cleats or sidewalls.

Top side with spikes on request.

Sprockets, wheels and disks with 1.5" square bore on request

The standard sprockets we offer have a square bore for a 40x40 mm drive shaft.

They can be mounted on other shafts with special adapters.

Please enquire for any other dimensions of round or square shaft.

DEL/SYNC®

The positive drive DEL/SYNC® is a reinforced homogeneous belt combining conveyance and synchronous drive with extreme precision and hygiene.

It offers **excellent guidance** thanks to internal moulded teeth and **precise positioning** of the transported products.

The DEL/SYNC® is **reinforced with aramid reinforcements** that eliminate elongation. Both the upper and lower surfaces are easy to clean and ensure **optimal hygiene**. DEL/SYNC® also works with **small pulley diameters**.

Products in the DEL/SYNC® range offer a belt tailored **to different applications**. Consideration should be given to the need for friction, pulley diameter, loads conveyed, length of conveyor...

We distinguish 3 series of belts in the range:

Series 010: Lightweight, thin belts with a 10mm pitch for use on small pulley diameters.

Series 100: Belts with a 10mm pitch, of greater thickness and strength, used for handling higher loads.

Each belt in these two series is offered in a newer variant with deeper teeth. These belts have the following advantages

- Better guidance on the centre distance, especially in the case of side loading on the belt.
- Better drive on the sprocket when loads are high.

The AG110R+GR belt is available with a rice grain pattern on the bottom, which reduces frictional forces and improves sliding on the conveyor bed, especially in greasy and wet conditions.

Serie 200: Special belts on request with a pitch of 8 to 12.7mm for long lengths.

Possibility of manufacturing belts with specific characteristics (thickness, hardness, distribution of cords, two coats). Minimum quantity, please consult us. Reinforced belts are finger jointed.

A molded studded surface is available on request.

Synchronous shaped profiles can be fitted to the belt to ensure accurate indexing of the conveyed products.

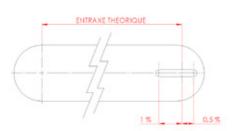

DEL/SYNC®

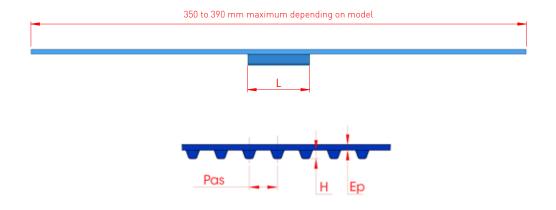

To facilitate the assembly and adjustment of a DEL/SYNC® belt, it is essential to provide a **fixed tension system** with **take up equal to 1.5%** of the length of the conveyor. (-1%; 0.5% compared to the theoritical distance).

The tension should be checked with the template supplied with the belts.

In the case of belts installed in parallel, **independent tension** systems must be provided.

A mechanical quick release system for the return shaft facilitates the assembly/disassembly of the belt, especially for cleaning operations on the conveyor.

GUSSET (CLEAT SUPPORTS)

Gussets are reinforcements welded behind vertical cleats to provide superior stiffness in the event of higher loads.

- 3 standard types and 2 thicknesses (5 and 8 mm) are offered depending on the height of the cleats, the load supported and its distribution on the cleat.
 2 to 5 gussets distributed over the width of the
- 2 to 5 gussets distributed over the width of the cleat.

OTHER CLEATS

- 1. Welded cleats
- 2. Flat profile
- 3. Round profile
- 4. Trapezoidal profile

ACCESSORIES

LONGITUDINAL GUIDES

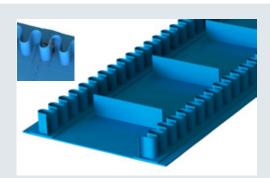

TRAPEZOIDAL PROFILES

Trapezoidal profiles of 6x4mm, 8x5mm, 10x6mm, 13x8mm or 17x11mm can be welded on the upper surface of the belt.

- Arranged over the belt width to channel products.
- On the top side to retain small products.
- Fitted to the edges of a cleated belt to retain the belt in the transition from one angle to another

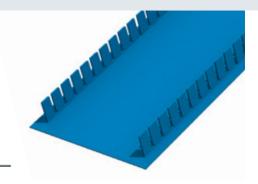

SIDE WALLS

- For efficient containment of conveyed product (bulk).
- Heights from 20 to 80 mm.
- Belts with mechanical fasteners can also have the walls fastened mechanically.

STRAIGHT SIDE WALLS

- For lateral holding of objects on the belt
- Edge height: 20 to 140 mm
- Standard cutting, possibility of adaptation according to the application

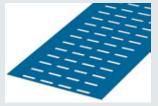

PERFORATIONS

Perforated belts are available:

- for draining.
- for applications where a vacuum is required to hold a product in position.

Diameter, shape and positioning of holes can be discussed with our technical staff. Punching available over the entire belt width up to 1800 mm wide.

RETAINING CLIP

The retaining clip locks the sprockets, wheels and disks laterally on a square 40x40 mm shaft.

^{*}Specific adapters for POSITIVEBELT® PO2H polyester: reference PLAQMD...-PO-002

JOINING METHODS

HOT AIR WELDING

CONVEYOR BELTS WITH A WIDTH OF 1100 TO 1900 MM WELDING TO THE CORD USING A HOT AIR GUN

Accessories

AFFLEUREUSE-001 FRAISE 60-001

GABARIT-AFFL-001 FRAISE2T-001

CUT RESISTANT GLOVES -**GANTSPRO**

Hot blowtorch + abusus, not included in the kit. Contact us

MECHANICALLY FASTEN JOINS

WATCH OUR JOINING VIDEOS ON OUR YOUTUBE CHANNEL You Tube

JOINING WITH A HEAT PRESS

DEL/SYNC is joined using a traditional belt press. The fingers are cut to a specific shape. The belt press welds at 5 bar.

FASTENERS

The DEL/DRIVE® 50, POSITIVEBELT® and S/DRIVE® conveyor belts can be jointed with mechanical fasteners to facilitate removal and re-fittner.

The clips facilitate removal of the belt by removing the spindle between the 2 ends for quick dismantling and cleaning of the belt and conveyor.

STAINLESS STEEL FASTENERS

- Removable joint comprising 2 half-clips with stainless steel spindle.
- For belts 1.5 mm to 5 mm thick.
- Suitable for all widths.
- Using normal mechanical fastening technics.
- Suitable for all positive drive belts, except DEL/SYNC..

PLASTIC FASTENERS

- Available on certain thicknesses of polyurethane or polyester monolithics. Please enquire.
- Food quality (EC FDA).
- Allows use on metal detectors.
- Up to 1100 mm in width, above contact us.

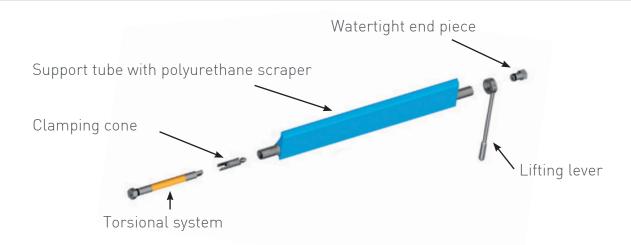

SCRAPER

The DEL/CLEAN scraper efficiently cleans the belt, ensuring permanent cleanliness of conveyor belts and avoids:

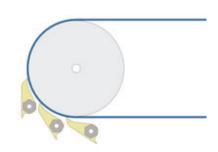

- clogging up the conveyorstaining conveyed materialsloss of materials

The DEL/CLEAN scraper offers many benefits:

- Small footprint
- No lateral misalignment
- Easy and quick to mount
- Can be adapted to existing or new installations
- Fits all types of conveyor belts
- Easy to clean
- Easier maintenance
- High resistance to hydrolysis: Ether base
- High resistance to abrasion: Ester base

The position of the scraper may vary depending on the need of recover the product.
